

ESFV Rotary star feed ceramic valve

Structural characteristics

Also known as rotary discharge valve or star feeder valve.

Performance Characteristics: Fully ceramic-lined, clean and non-polluting, precise adjustment, prevents backflow.

Typical Applications: Used in battery powder discharge valves and similar applications.

Main technical parameters

Nominal Path	DN150~DN300
Nominal pressure	PN10~PN16/150Lb
Service temperature	-40°C~200°C
